Safety Surfaces for Work & Play

Sole Distributors & Certified Installer of Play Matta - Queensland

About us

Creative Playground Surfaces Pty Ltd – our core business is supplying and installing specialist safety flooring for playgrounds, parks, pools and workplaces.

We are the sole supply & install agents for Play Matta™ in Queensland as well as supply alternative soft play options such as CSBR Rubber, Artificial Turf & Bark. We also provide full project management, installation & construction for play areas, wet & dry, exercise areas as well as providing a wide range of related landscaping & constructions services.

We are completely committed to delivering quality projects on time, and to establishing lasting relationships based on performance, mutual respect and trust. We provide you with an analytical approach to Project Management and Project delivery by fixing issues before they become a problem.

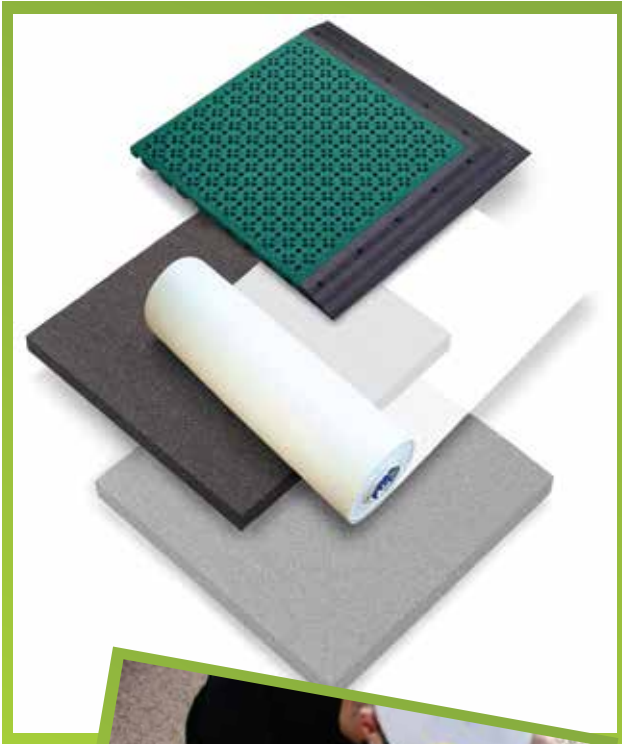

Our extensive networks throughout Australia have resulted in mutually beneficial and successful relationships with councils, schools, landscape architects and the private sector. We foster a safe and dynamic work environment that encourages new ideas, innovation and growth.

Matta™ is a New Zealand based company that provides world-leading safety solutions for playgrounds, exercise and industrial areas all over the world. Since being founded over 30 years ago, Matta has proudly manufactured the Play Matta™ range in New Zealand from recycled materials.

Creative Playground Surfaces in conjunction with Play Matta™, have an impeccable record of delivering quality, professional and customer focused service delivery which has been repeatedly confirmed by our customers and the communities within which we work.

Why Choose Play Matta™?

Play Matta™ Original is a two layered surfacing solution which couples the cushioning of rubber, with the exceptional durability of safe flexible PVC. Designed to give years of trouble free play for kids, parents and play space operators alike.

Thanks to its hard-wearing and low maintenance qualities, Play Matta™ Original is the perfect choice to protect your playground investment, and the kids that enjoy it, now and into the future. Play Matta™ tile composition offers up to 4.5 metres of fully compliant impact protection.

Key Features

- Compliant impact protection
- ASNZS 4422, ADA & UFAS accessibility & safety standards
- Safe & durable recycled & recyclable materials
- Low maintenance - weatherproof/free draining UV & fire resistant, easy to clean
- Welded Seams - strong unitary surface
- ISO certified quality & safety assurance
- Certified & Guaranteed Installation
- 6-Year Full Product Warranty

Play Matta™ Original

Schools & Early Childhood

Play Matta™ Original is the preferred supplier to a number of leading childcare centres, school districts and schools across Australasia, North America and the UK. Compliant impact protection, low maintenance and free draining for all season play - keeping kids on playgrounds and dirt and grime out of classrooms.

Indoor/Outdoor Fitness

Play Matta™ products are used in gyms, fitness centres and outdoor fitness stations for their superior durability, ergonomic benefits and sound control.

Public Playgrounds

Keeping playgrounds open is our business. The preferred choice of landscape architects, maintenance personnel and kids alike. Play Matta™ is designed to keep public playgrounds compliant, open and free of repetitive and costly maintenance issues.

Play Matta™ Rebound

The Play Matta™ Rebound tile is a robust indoor tile, suited for areas where play safety, hygiene and ease of cleaning is important.

The smooth top finish is hygienic and easy to clean, providing good traction under foot, and indoor sound control.

Play Matta™ Re-cover

By re-covering your tired poured-in-place (PiP) surfacing with Play Matta™ Re-Cover you will be guaranteed long lasting quality and performance for years to come. You'll also be saving PiP from landfill giving it a new life.

Play Matta™ Kids

The Play Matta™ Kids range is a hygienic, versatile and lightweight safety surface for wet and dry, indoor and outdoor, play applications. Closed and open surface options available, perfect for environments such as childcare facilities, where hygiene is a priority and children's hands may be in direct contact with the floor.

Play Matta™ Kids tiles provide versatile safety flooring with light weight tiles, half the size and thickness of other Play Matta™ tiles. They can be easily installed in layouts to suit most low impact play areas.

Play Matta™ Wet Areas

Play Matta™ provides a range of solutions for wet environments requiring chemical and UV restiveness, high drainage and play appropriate traction underfoot.

Play Matta™ Scuff Pads

Play Matta™ Scuff Pads integrate seamlessly with surrounding loose fill surfacing and provide years of compliant, low maintenance performance in high use areas, such as under swings and slides on the playground.

Play Matta™ Safety

Play Matta™ Safety - the unbeatable feel of grass.

Play Matta™ Safety surfacing promotes grass growth and retention, while ensuring compliant impact protection. Providing the safety and durability of synthetic surfacing, with the unbeatable feel of grass underfoot.

Play Matta™ Safety surfacing is self draining and ideal for any grassed environment where heavy use causes degradation, or where surface water and mud are problems.

Perfect for providing fall height attenuation, extra traction and grass protection for areas such as walking tracks, slopes, flying foxes or public access trails. Nothing beats the look and feel of grass underfoot.

Healthy soil, a good initial seed sowing process, light and water will ensure good grass growth up and through the Play Matta™ Safety tiles. The tiles can be regularly mowed after making sure blades do not connect with product, which may cause damage.

Matta™ Sustainability

Although Matta™ safety surface tiles are heavy-duty and hardwearing, they aim to have the lightest possible impact on the environment. Their recycled products are made from up to 85% recycled materials.

Matta™ is proud to have pioneered recycling in New Zealand. Since 1992, they've turned over 60 million kg of trash otherwise destined for landfill (such as tires, cables, road cones and even gumboots) into highly durable and safe surfacing products that are recyclable in their turn.

The Recycling Process

Material sourcing

Waste plastic for top layer safety tiles are sourced from healthcare, construction and transport industries amongst others. Rubber buffings for the underlying shock pads are sourced from truck tire re-treading operations.

Washing & testing

Recycled plastic and rubber is washed and graded to ensure only quality materials are used for processing.

Compounding & blending

Virgin plastic is compounded, and recycled plastic and pigments are blended, along with other additives to ensure product quality. Graded rubber buffings are mixed with binder and prepared for 'baking'.

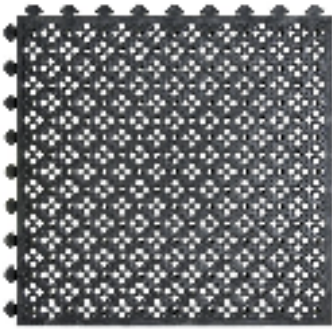

Moulding & quality testing

Compounded and blended plastics are injection molded to form top layer tiles, and rubber buffings are 'baked' in a purpose built oven to form shock pads. Batches are tested for fall height attenuation and quality assurance.

SPECIFICATION SUMMARY

PLAY MATTA™

Play Matta™ Original Surfacing

Critical Fall Heights (to ASTM F 1292)

Name	Description	System Thickness	CFH (ASTM)	CFH (AS/NZS, BS EN)
Tile Only	Play Matta™ tile only	25mm/1"	1'	0.3m
B System	Play Matta™ Original over B1 shock pad ¹	60mm/2"	5'	1.7m
A System	Play Matta™ Original over A1 shock pad ¹	95mm/4"	9'	2.9m
A+B System	Play Matta™ Original over A1 + B1 shock pad ¹	125mm/5"	12'	4.5m
A+A System	Play Matta™ Original over A1 + A1 shock pad ¹	165mm/6"	14'	N/A

1 - Separated by a layer of geotextile weed barrier above and below the shock pad

Additional Standards Compliance

Play Matta™ Original surfacing is compliant with all provisions under the Australian Standard AS/NZS 4422 'Playground surfacing - Specifications, Requirements and Test Methods'. Additional requirements are also met under various US (ASTM) Standards and the British Standard BS 7188 'Impact Absorbing Playground Surfacing - Performance Requirements and Test Methods'

Fire Resistance	Play Matta™ Original meets requirements under ASTM E108 and British Standard BS 4790 referenced in BS 7188. The surface is self extinguishing.
Slip Resistance	Meets requirements under BS 7188
Indentation & Abrasion Res.	Meets requirements under BS 7188
Wheelchair Access	Compliant with ADA accessibility requirements as per ASTM F1951-14
