About Opal

Opal is a completely synthetic EPDM (ethylene propylene diene monomer) rubber, coloured all the way through and formulated for brightness of colour and competitively priced.

- Brightest colours - Completely synthetic rubber.
- Great surfact elasticity - High polymer content.
- Good pigments - The most vibrant colours.
- Mass production - Competitively priced.
- Consistent colours - Manufactured under ISO 9001 certified processes.
- Reliably sulphur cured - Fully vulcanised.
